# Accelerating Banking Transformations on Cloud
Finacle and AWS

Finacle's digital banking solution suite on AWS brings the full benefits of the cloud to banking, delivering business agility, lower total cost of ownership, automated intelligent operations and accelerated ecosystem innovation.
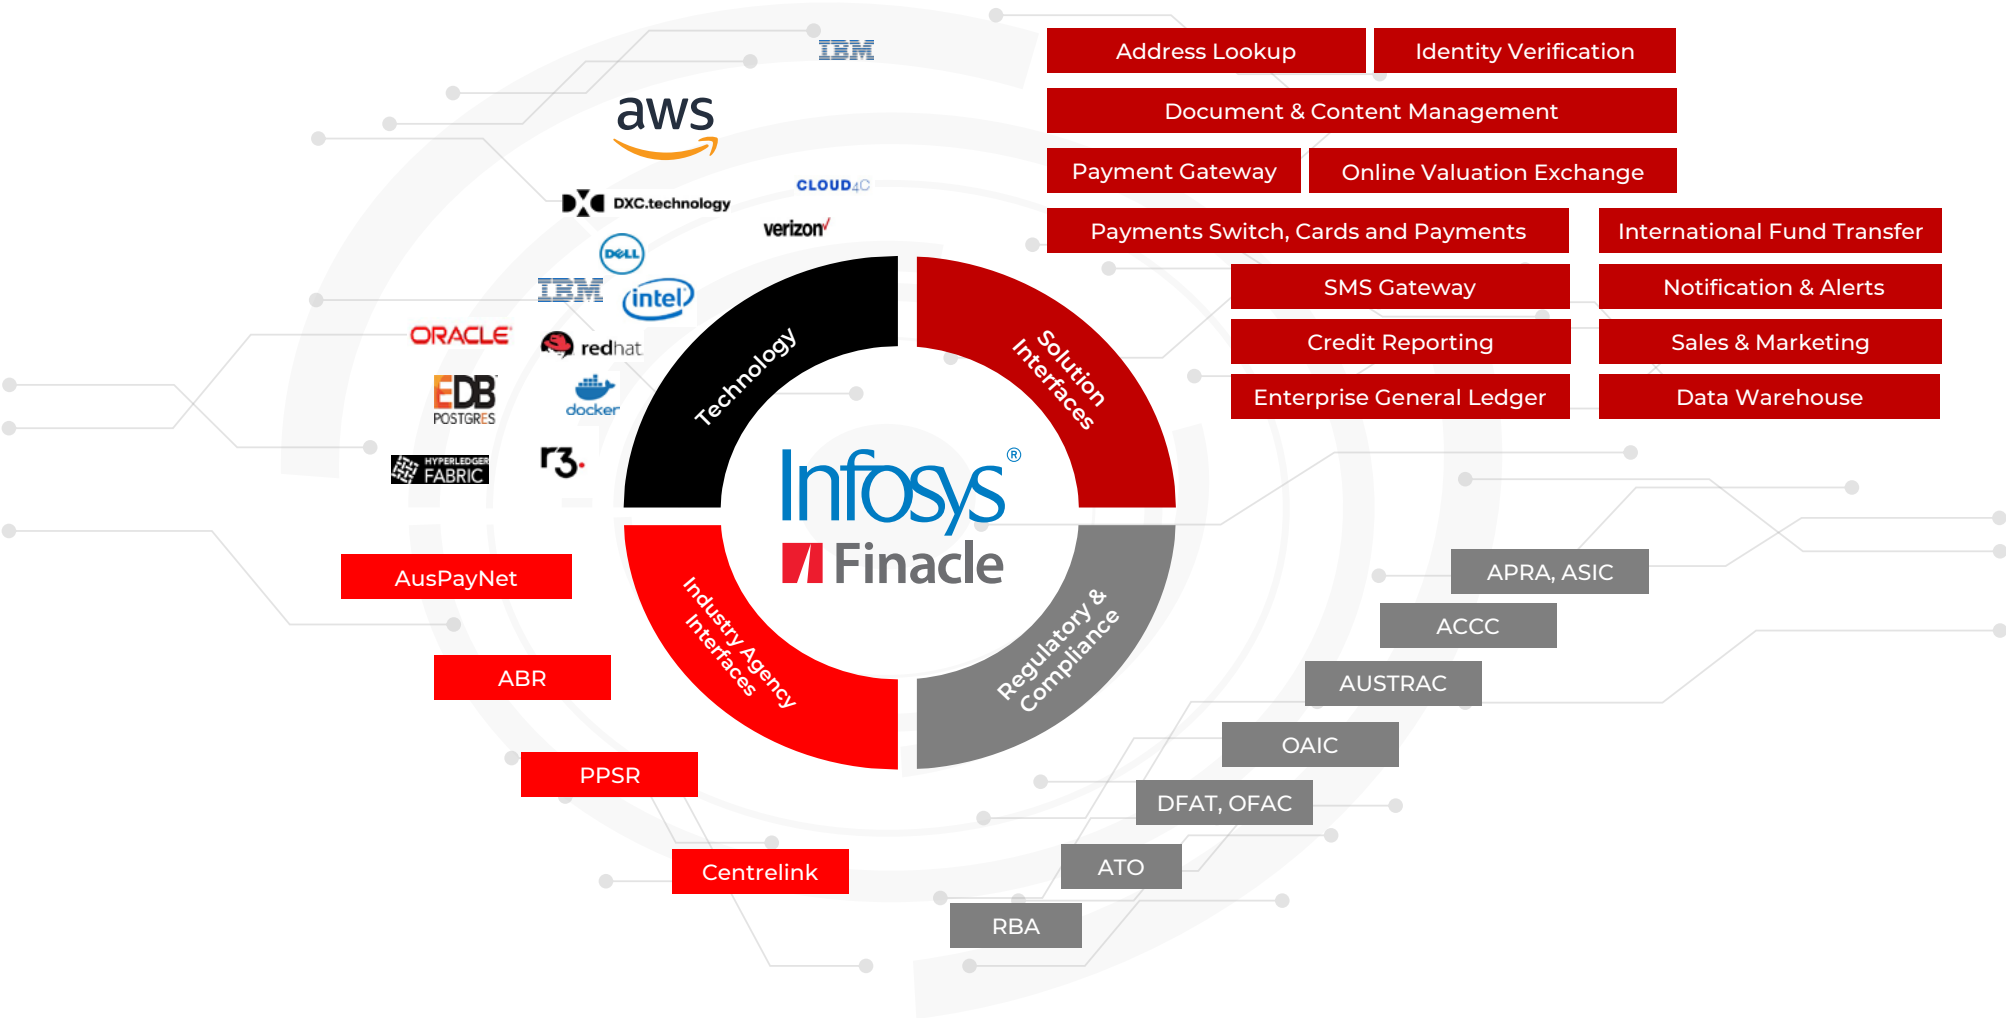

Faster time to market
Deployment of Finacle solutions on AWS is faster than on-premises, speeding up innovation and time to market
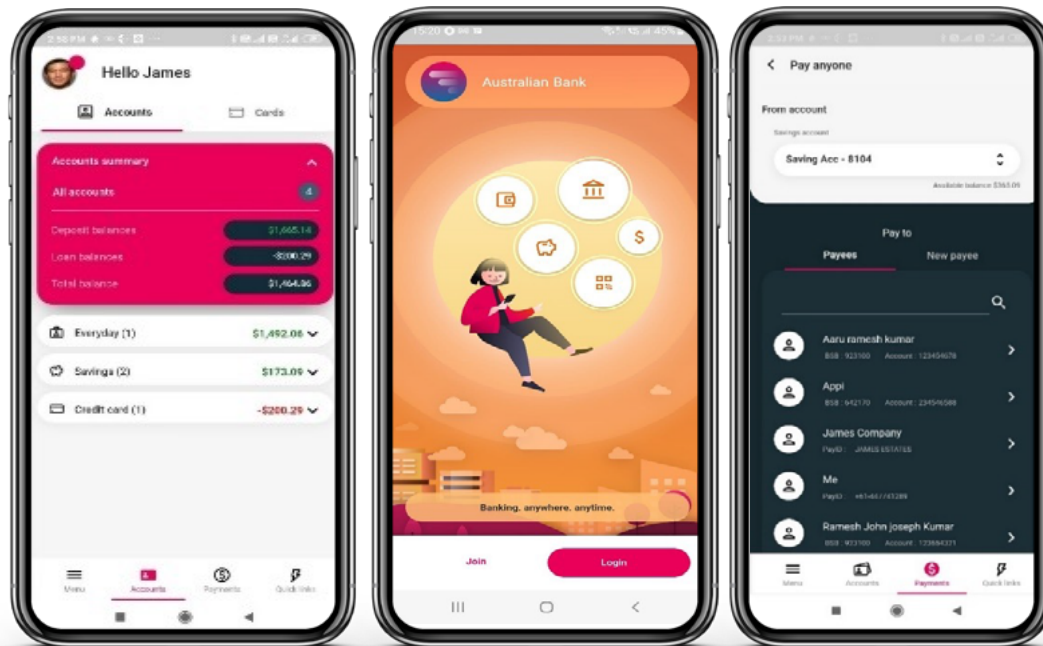

Highly Scalable
AWS Auto Scaling helps traditional banks and startups ramp up banking compute services, in line with key areas of business growth

Australian Military Bank
Powered by Finacle Digital Banking SaaS

Australia's longest serving community bank became a nimble, new age digital first bank with the Finacle Digital Banking SaaS on cloud

- Upgraded to a full stack digital banking suite in under 10 months
- Reduced IT expenditure
- Automatic updates and seamless roll-out of new features for rapid adoption by customers
- Onboarding customers / opening new accounts now in less than 2 minutes
- Quick turnaround times for members
- Automation of routine activities
- Greater personalization of products and services

AMB turned Consumer Data Right regulatory compliance into an Open Banking opportunity with Finacle APIs

Partnering with Infosys has allowed the Bank to develop and integrate the Finacle Open Banking module with our Open Banking 'Holder as a Service' (HaaS) platform provider, biza.io. The integration was seamless and delivered within three months of contract signing and allowed the Bank to be compliant before the regulatory compliance due date. By providing consent to use Open Banking, our members can now have their data shared securely with 3rd party services.
